# Daylight on demand

**Skydomes • Curbs • Ventilation Systems •  
Automatic Opening Ventilation (AOV) • Extra's**

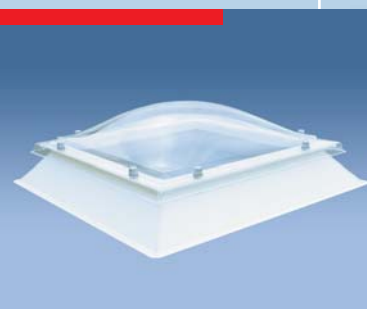

# van deudekom plastics

Van deudekom plastics bv is more than 40 years specialised in the development and production of high quality systems for access of daylight through the roof of industrial and public buildings. The product availability is: skydomes, curbs, ventilation systems and Smoke and Heat exhaust ventilation systems. There are a great number of sizes and variations. Van deudekom plastics bv is an ISO 9001 certified company. MegaluX-products are delivered according NRK daklicht guarantee standards. MegaluX-rooflight systems meet the European Standard CEN-EN 1873.

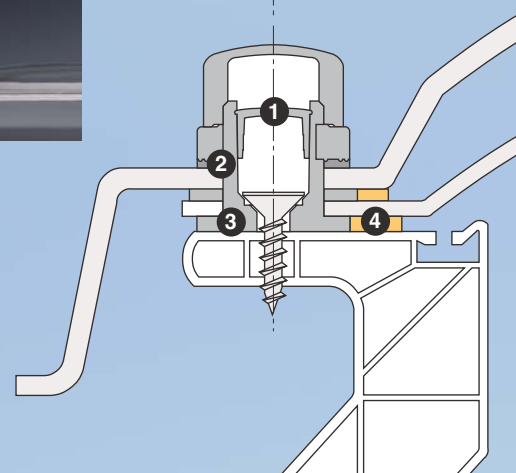

## MegaluX-skydomes

High impact polycarbonate skydomes

High impact polycarbonate fixings

- 1) Anti-burglary cap
- 2) EPDM ring
- 3) Optimum distance
- 4) PE tape

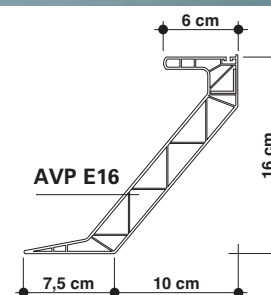

**MegaluX-skydomes** can be ordered in single-, double and triple skin types. In clear/opal and anti glare. Single skin skydomes are used in non insulated or ventilated rooms. Double and triple skinned domes are produced for optimum thermal insulation.

During production of MegaluX-skydomes we use only sheets of the highest quality of Acrylic (pmma) and High impact polycarbonate (pc) the latter often used against burglary.

**MegaluX-fixings**  
MegaluX-skydomes have security fixings comprising a screw cap and security insert to restrict intruders. The MegaluX-fixings are standard to most other euro-fixings. The whole system is set for mounting without any problems.

**See our comprehensive pricelist and website**

## MegaluX-curbs

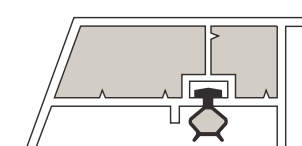

PVC curbs for a optimum insulation double skinned

For a good connection to the roof construction DPI let you choose between PVC and (GRP) polyester curbs.

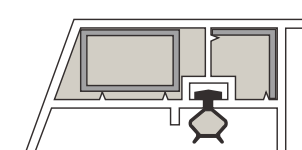

**PVC curbs**  
For a good insulation they are double skinned. For an optimum connection with the roof material the outside of the curb is profiled. PVC curbs are completely recyclable.

**(GRP) Polyester curbs**  
These are also double skinned with a filling of polyurethane hardfoam. The outside is raw for optimum fixing with the roof material and finished off with a weatherproof top coating. Both curbs have a white internal finish.

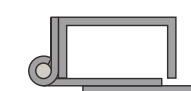

## MegaluX-opening systems and ventilation

PVC normal

PVC extra strong

Aluminium

As well as to the function of light transmission by the roof MegaluX-skydomes may be used for **ventilation**. The skydomes will be supplied with a PVC or aluminium ventilation system.

**PVC or aluminium ventilation systems** are double skinned and may be reinforced with an aluminium or steel insert.

Aluminium ventilation systems can be obtained for ventilation or smoke and heat exhaust system.

Skydomes can be used for easy **roof access**.
